

Alberto Diaz-Tostado

Senior Software Engineer, Growth | Product Engineer

Product engineer building growth experiences and the platform foundations behind them.

Experience

Databricks - Senior Software Engineer, Growth (2023-Present)

- Focused on Free Edition product experience, onboarding, and lowering the barrier to entry.
- Reduced latency by up to 15% across multiple high-visibility workflows through a platform-level solution.
- Built GraphQL-based data fetching and static asset infrastructure across product surfaces.

Clari - Engineering Manager / Senior Software Engineer (2018-2023)

- Founded and led the Frontend Infrastructure team.
- Built reusable components, shared tooling, a design system, and a GraphQL service layer.
- Led adoption of GraphQL and React hooks.

Santa Clara University - Adjunct Lecturer (2018-2022)

- Taught web programming.

E*TRADE - Software Engineer (2017-2019)
